Wrotham Hill Pine Marten Project
Pine martens are a native mammal of the British Isles, but they have become extremely rare in the UK. The Wrotham Hill Pine Marten Project is a conservation project aimed at increasing the population of pine martens in the area. The project involves creating and maintaining suitable habitat, including planting native trees and shrubs, and installing camera traps to monitor the population. The project is currently in its early stages, but it is hoped that it will help to increase the number of pine martens in the area and ensure their long-term survival.

Pine martens in Shropshire
Pine martens (Martes martes) are a native mammal of the British Isles, but they have become extremely rare in the UK. The Wrotham Hill Pine Marten Project is a conservation project aimed at increasing the population of pine martens in the area. The project involves creating and maintaining suitable habitat, including planting native trees and shrubs, and installing camera traps to monitor the population. The project is currently in its early stages, but it is hoped that it will help to increase the number of pine martens in the area and ensure their long-term survival.

Nature Reserves
The UK has a rich and diverse natural heritage, with a wide range of nature reserves and protected areas. These reserves are important for the conservation of our natural environment and the many species that live there. The UK has over 10,000 nature reserves, covering a total area of over 1 million hectares. These reserves are managed by a variety of organizations, including government bodies, local authorities, and voluntary groups. The UK's nature reserves are a testament to our commitment to the protection and conservation of our natural environment.

13th June
A budget for the morning
average having a good day around
He looked at some common garden plants!
So I bought me some for you to see, then
added a few more that he had seen at

Gardens. Can you get on the garden?
Landscape. Can you get on the landscape?

Help us develop the Local Nature Recovery Strategy (LNRS) for Shropshire and Telford & Wrekin.

This is a strategy for nature and people, that aims to restore and enhance the natural environment and the services it provides for our health, well-being, economy, and climate.

Helping nature recover is important to us all, but we can't do it without your help.

Get involved at <https://bit.ly/ShropshireLNRS> or email LNRS@shropshire.gov.uk
